## About Me

Information Systems graduate (Telkom University), currently the sole in-house system analyst at Primaland, managing 4 concurrent projects with a 5-person vendor development team. Hands-on across the full analysis cycle, from requirement meetings to PRDs, UML, ERD, wireframes and UAT comfortable with SQL on MySQL and Oracle

## Education

Telkom University, Diploma in Information Systems **Sep 2022 - Nov 2025**

**Relevant Courses:** Algorithm and Programming, Systems Analysis and Design, Web Programming, Database, IT Project Management, Software Testing, and UI/UX Design

## Work Experience

**System Analyst**

PT Primaland | Mar 2026 – Present

- Serve as the sole in-house system analyst, reporting directly to the Director as a member of the internal heads forum, translate business needs into requirements, wireframes and UAT scenarios for a 5-person development team at PrimaTech, the group's IT vendor
- Manage 4 concurrent projects, including the Mycozykos boarding-house platform, Hirai Hills website redesign and AI dynamic pricing, and finance budgeting integration, report progress to management through executive summaries
- Built an inventory management system for the Operations division from scratch, now live and tracking 95 assets worth Rp1.1 billion, with depreciation-based book values, division and location filters, and Excel export

**Intern - Associate Project Manager**

PT Avatar Solusi Digital | Dec 2025 – Feb 2026

- Gathered and analyzed client requirements in stakeholder meetings; prepared PRDs and meeting minutes
- Designed business process flows and UML diagrams (use case, activity) as the basis for development
- Coordinated with developers to keep delivered features aligned with business needs
- Wrote and executed UAT scenarios and documented defects for the development team

**Intern - Junior System Analyst**

Center Of Excellent Smart City, Telkom University | Jul 2024 – Jul 2025

- Produced UML diagrams and technical documentation as the foundation for TOAST (Two-Way Application Ticketing System), a digital ticketing system for Keraton Kasepuhan Cirebon built with PT Curaweda
- Designed UI/UX prototypes for TOAST's admin module (ticket monitoring and management) and financial module
- Analyzed system requirements and simulated Raspberry Pi and camera placement for an IoT-based automated waste classification system (Tel-U Waste Bank)

---

## Campus Roles

**Teaching Assistant - Algorithm and Programming (part-time)** **Sep 2024 - Jan 2025**

Faculty of Applied Science, Telkom University

- Prepared learning materials and explained programming logic to 30+ students; helped evaluate practical assignments

**Laboratory Assistant – IT Support (part-time)** **Jun 2023 - Aug 2025**

Faculty of Applied Science, Telkom University

- Managed network, IoT and software inventory; resolved hardware, software and network issues on 40+ lab PCs

---

## Projects & Achievments

2nd Place – National UI/UX Design Competition, Universitas Sebelas Maret

- Designed a mobile app prototype using Design Thinking and UX principles in a national inter-university competition

TANELA – Tanah Sejahtera (Student Creativity Program) | *Machine Learning & System Analyst*

- Built an ML-based soil suitability classification app; created its data model and system documentation

---

## Key Competencies

- Business & System Analysis: Requirements gathering, PRD, SRS, URS, UML, ERD, process flows, wireframes, UAT
- Methodologies: Agile (Scrum), Waterfall
- Tools & Technical: JIRA, Drawio, SQL, Figma, Confluence
- Domain Expertise: CRM, Product Development, Inventory Management
- Soft Skills: Analytical Thinking, Problem Solving, Team collaboration and effective communication
